

Do NOT allow Indiana's No-Call list be be weakened by allowing banks to contact individuals that have accounts with them whenever they wish!! Consumers should be allowed to dictate who contacts them on their private home numbers! Whether published or not, these numbers ARE private...they are not public numbers, and consumers that pay for this service have a right to dictate who calls them! Before I was on the no call list, I was hounded unmercifully day and night and weekends too. I had a charge card through a bank once that would not stop calling me for solicitations even when I requested. I had to close the account and not do business with them anymore. This type of business behavior needs to be stopped.
